

Entry For: _____

today's date

What a relief! I am so _____ that the Sun won't explode as a _____ after all.

adj

noun

The Sun is the wrong kind of _____. Only _____ stars can explode, ones that

noun

adj

are the color _____ or _____. Stars like the Sun, which are _____, only

adj

adj

adj

get bigger, change colors to _____, and then finally _____. And that makes me

adj

adj

feel so _____.

adj

Amazingly, the stars that are less _____ than the Sun, which are _____

adj

adj

colored, don't even do that! They just hang around, _____!

adj

There is something else that we discovered from the _____. The

noun

_____ of a star depends on its mass! _____ colored stars, which are

adj

adj

_____ massive than our Sun, live a long time. But, _____ and _____

adv

adj

adj

stars, which are _____ times more _____ than our Sun, explode. The

adj

noun

_____ colored stars explode more quickly than the _____ ones.

adj

adj

And another thing, the _____ depends on the mass as well! _____

noun

adj

colored stars are very _____, _____ colored stars are not quite as bright, then

adj

adj

_____ colored stars are the next brightest and finally the _____ stars are the

adj

adj

dimmiest. Of course, I mean that if two stars were right next to each other the

_____ and _____ would be brighter than the _____ or _____ stars.

adj

adj

adj

adj

I mean, a candle in your hand looks brighter than city lights from kilometers away! And

the Sun looks really _____, but that's because it is so much closer to us than other

adj

_____.

noun

Well, that's it for today, but what a day! I am really _____ about the work

adj

we did today and I feel _____ that the Sun won't explode.

adj
